Phone: +380664903369
TryHackMe: https://tryhackme.com/p/sdfc33

Profile Summary

Motivated and analytical Junior Cybersecurity Specialist with hands-on experience in network traffic analysis, penetration testing, and SOC fundamentals. Skilled in using tools such as Wireshark, Nmap, and Metasploit. Practical knowledge of OSINT tools (Shodan, Censys, ZoomEye), phishing defense, and AWS cloud configuration. Strong foundation in cybersecurity principles (Cyber Kill Chain, Supply Chain Attacks, IAM) and practical experience through TryHackMe (33 rooms completed) and Cisco Net Academy.

Technical Skills

Wireshark, Nmap, Metasploit, OSINT (Shodan, Censys, ZoomEye), AWS (EC2), IAM, Cyber Kill Chain, Ethical Hacking, SOC Monitoring, Phishing Defense, Linux, Splunk (basic), Python (basic scripting), MCP (Model Context Protocol).

Experience & Education

Background: M.A. in Physical Education (Kharkiv Academy of Physical Culture).
Professional experience in leadership, coaching, and mentoring — skilled in psychology and social engineering. Transitioned into cybersecurity with strong motivation and continuous learning.

Courses & Training:
- TryHackMe (33 rooms completed)
- Udemy: Ethical Hacking Course
- Cisco Networking Academy: Cybersecurity Essentials
- GoIT: Cybersecurity Fundamentals

Achievements

• Built and configured personal cybersecurity lab (Kali Linux, Metasploitable).
• Successfully simulated penetration testing environments.
• Practical understanding of Web3 and Smart Contracts security principles.
• Active learner on HackerOne and TryHackMe.

Career Goals

Looking to join a cybersecurity or SOC team as a Junior Specialist to apply hands-on skills, grow in threat detection and incident response, and contribute to organizational security improvement.
